

# PU9411

High Temperature Premium TPU

## PU9411

### High Temperature Premium TPU

**PU9411** is the new generation polyurethane developed by **Kastas Sealing Technologies** that combines excellent viscoelastic properties and extrusion resistance for high temperature applications.

- High Temperature Resistance
- Superior Abrasion Resistance
- High Extrusion Resistance
- Hydrolysis Resistance

The new PU9411 polyurethane assures better results and life-time than other polyurethanes in the market with its superior properties that have proven itself in long time tests both in-house and also at the field.

**PU9411** polyurethane has superior extrusion resistance even at extreme temperatures.

The new premium polyurethane **PU9411** is developed for challenging applications and extreme operating conditions where high temperature resistance is required. **PU9411** can be used in various seal designs, mainly rod seals for mobile equipment and generally all heavy duty applications where extrusion, high temperature, abrasion resistance are required at the same application. **PU9411** is the ultimate solution for all cylinders that are exposed to high-temperature painting process.

#### PU9411 is recommended for the following designs:

Rod Seals: XT200®, FR200®, K31, K33

Buffer Seal: K29 Wipers: K05, K107
